GENERAL INDEX[1]

A

Absorption, in potato discs, effect of salt concentration on, 103
of radioactive carbon dioxide by sunflower leaves, 257
selective, of cations by higher plants, 691
Accumulation, of arsenic, by shoots of Sudan grass and bush bean, 521
Acid, formic, in alcoholic fermentation, 755
lactic, formation by yeast in alcoholic fermentation, 343
nitric, use in control of pH and nitrate levels, in nutrient solution, 834
phenylacetic, lack of inhibition of lateral buds by, 203
succinic, as a metabolite in plant tissues, 771
Action, antagonistic, of chlorides to toxicity of iodides, 393
Aeration, effect of, on growth of tomato in nutrient solution, 327
Agencies, affecting production of substance B, in *Rhizopus suinus*, 461
Alcoholic fermentation, formation of formic acid in, 755
formation of lactic acid in, by yeast, 343
Alfalfa hay, hexose-phosphate in, 212
Alga, *Nereocystis luetkeana*, pressure-composition relationships of gas in, 361
ALSBERG, CARL LUCAS, obit., 218
Amendments, to constitution, 217
Ammonia, determination in soil, 46
Analysis, soil, 39
spectroscopic, of plant extracts for chlorophylls *a* and *b*, 651
ANDERSON, ALEXANDER PIERCE, note on dedication, 841
portrait, frontispiece, October no., PLANT PHYSIOLOGY
ANDREWS, FRANK MARION, obit., 219
Anions, and cations, interrelations in a three-salt nutrient, effect on barley seedlings, 813
Annual election, 657
Annual meeting, eighteenth, 837
seventeenth, 215
review, of biochemistry, 842
of physiology, 660
Antagonism of chlorides to toxicity of iodide, 393
Apparatus, for absorption of CO_2, 643
for automatic watering of experimental plots, 208
for automatic measurements of CO_2, 645
for culture of plants, 386
for integrating illumination, 630
for measuring gas pressure, manometric, 363
for recovery of tissue fluids, press, 419
for thermionic control of temperature, 649
for translocation demonstration, model, 832
for vacuum distillation, 679
Apparent photosynthesis, apple leaves, influence of Bordeaux mixture on, 721
Apple leaves, influence of Bordeaux mixture, on transpiration and apparent photosynthesis, 721
influence of soil moisture on photosynthesis, respiration, and transpiration of, 565
Apples, McIntosh, respiratory metabolism during ontogeny, 799
Area, root, effect on water uptake, 553
Arsenic, accumulation by shoots of Sudan grass and bush bean, 521
Asparagine metabolism, sugar beet, effect of high concentrations of CO_2, 677
Assay, for virus activity, 664
Aster, var. Heart of France, effects of supplementary illumination on carbohydrate and nitrogen metabolism of, 621
Automatic, measurements, conductivity of CO_2, 643
watering of experimental plots, 207

[1] Papers published in PLANT PHYSIOLOGY are indexed in *The Agricultural Index*, The W. H. WILSON Co., New York.

Auxin, effect on root formation, *Phaseolus vulgaris*, 586
Available nitrogen, effect of form on calcium deficiency in bean plant, 145
Avocado leaves, pH determination in, 407
Award, BARNES life membership, 215
STEPHEN HALES, 216

B

Balance, water, in the onion root, 447
Balanced solution, importance in nutrition of *Phymatotrichum omnivorum*, 11
BALY, E. C. C., Photosynthesis, 431
BAMANN, E., Methods of enzyme research, 220, 432, 659
Barley plants, nitrogen metabolism and respiration, 110
seedlings, effect of interrelations of cations and anions, in three-salt nutrient solution, 813
shoots, excised, transformation of sugars in, 599
BARNES, CHARLES REID, life membership award, 215
committee for, 1941, 840
Base exchange capacity, soils, determination, 43
BARTHOLOMEW, E. T., Unequal distribution of soluble solids in the pulp of citrus fruits, 293
Bean, bush, accumulation of arsenic in shoots of, 521
Bean plant, calcium deficiency symptoms, effect of form of available nitrogen on, 145
BECK, WILLIAM A., Production of solutes in growing epidermal cells, 637
Beet, sugar, effects of high concentration of CO_2 on glutamine and asparagine metabolism in, 677
Bicarbonate buffered solutions, effects of components on metabolism of potato discs, 481
Biochemistry, annual review of, 842
BLANK, LESTER M., A critical study of the nutritional requirements of *Phymatotrichum omnivorum*, 1
Bordeaux mixture, influence on transpiration and apparent photosynthesis, apple leaves, 721
Boron, related to calcium availability, 438
Botany, general, HARRY J. FULLER, 433
Bound water, in plant sap, effects of temperature and nutrition on, 785
nature of, in colloidal systems, 273
BOYSEN JENSEN, P., corresponding membership election, 217
BROYER, T. C., A press for recovery of fluids from plant tissues, 419
Buds, lateral, lack of inhibition by phenylacetic acid, 203
of yellow poplar, changes in composition, during dormant period, 415
Buffer capacities, of expressed sap, shortleaf pine seedlings, 321
Buffer constituents, of potato discs, effect of salt concentration on, 102
Buffered solutions, bicarbonate and phosphate, effects of components on metabolism of potato discs, 481
Bulb, effect of presence on water intake by root, 27
BURKHART, LELAND, Potassium determination by the cobaltinitrite method as affected by temperature and pH, 411
Bush bean, accumulation of arsenic in shoots of, 521
BUSHNELL, RALPH J., A highly simplified thermionic control of temperature, 647

C

Calcium, determination in soils, 52
relationship to boron in nutrition, 438
salts, effect of concentration on metabolism of potato discs, 85
selective absorption, 708
soluble, tolerance of shortleaf pine seedlings to variations of, 313
Calcium deficiency, symptoms in bean plant, effect of form of available nitrogen on, 145
Calculations, of results, in determination of chemical characteristics of soil, 41
Callistephus chinensis, var. Heart of France, effects of supplementary illumination on, 621

Capacity, base exchange of soils, determination, 43
water holding, of soils, determination, 42
Carbohydrate metabolism, of aster, effects of supplementary illumination on, 621
of potato discs, effect of salt concentration on, 91
Carbon, determination in soils, 50
radioactive, photosynthesis with, 654
Carbon dioxide, automatic conductivity measurement of, 643
effects of high concentration, on glutamine and asparagine metabolism, in sugar beet, 677
radioactive, absorption and utilization, by sunflower leaves, 257
Carbon source, effect on formic acid formation, 760
effect on lactic acid formation, 354
Cation, absorption series, 709
Cations, and anions, interrelations in a three-salt nutrient solution, effect on barley seedlings, 813
selective absorption by higher plants, 691
Cell, plant, distribution of intermediate products in, photosynthesis with radioactive carbon, 654
Cells, growing epidermal, production of solutes in, 637
Cesium, selective absorption, 708
CHANDLER, RAY CALVIN, Nature of bound water in colloidal systems, 273
Bound water of plant sap and some effects of temperature and nutrition thereon, 785
Changes, chemical, in yellow poplar during dormant period, 415
in constitution of A.S.P.P., 841
CHAPMAN, A. G., Tolerance of shortleaf pine seedlings for some variations in soluble calcium and H-ion concentration, 313
Characteristics, chemical, of soils, determination, 39
Chemical characteristics, of soils, determination, 39
CHILDERS, N. F., Influence of soil moisture on photosynthesis, respiration, and transpiration of apple leaves, 565
Influence of Bordeaux mixture and its component parts on transpiration and apparent photosynthesis of apple leaves, 721
Chlorides, antagonistic action on toxicity of iodides, 393
Chlorophylls, *a* and *b*, spectroscopic analysis of plant extracts for, 651
Cicada injuries, effect on later growth of trees, 827
Citrus fruits, unequal distribution of soluble solids in the pulp of, 293
CLARK, D. G., Automatic conductivity measurements of CO_2, 643
Climatic influences, foliar diagnosis studies on greenhouse tomatoes, 117
Cobaltinitrite, method of potassium determination, effect of temperature and pH, 411
COLLANDER, RUNAR, Selective absorption of cations by higher plants, 691
Colloidal systems, nature of bound water in, 273
Color differences, in citrus juice, 306
COMAR, C. L., Spectroscopic analysis of plant extracts for chlorophylls *a* and *b*, 651
Committee, CHARLES REID BARNES life membership, 840
Comparative transmission spectrograms, irradiated leaf extract, 210
different concentrations of leaf extract, 425
Composition, chemical, changes in buds and twigs of yellow poplar during dormancy, 415
of plants, determination of chemical characteristics of soil affecting, 39
Concentration, H-ion, tolerance of shortleaf pine seedlings to variations of, 313
of substrate, inequalities, effect on water uptake and root growth, 545
salt, effect on metabolism of potato discs, 85
Concentrations, high, of CO_2, effect on glutamine and asparagine metabolism, in sugar beet, 677

Conductivity measurements, automatic, of CO_2, 643
Conservation, of space, 841
Constitution, of A.S.P.P., changes in, 841
Containers, moisture distribution in soil in, 821
Contiguous regions of roots, comparison of rates of water intake, 19
Control, of pH and nitrate levels in nutrient solution, use of nitric acid for, 834
of red spiders, toxicity of selenium-containing plants as, 197
thermionic, of temperature, 647
COOIL, BRUCE J., Significance of phloem exudate of *Cucurbita pepo* with reference to translocation of organic materials, 61
Copper selective absorption of, 709
Corn, 547
toxicity of iodides to, antagonistic action of chlorides, 393
Corresponding member, election of P. BOYSEN JENSEN, 217
COWIE, DEAN B., Absorption and utilization of radioactive carbon dioxide by sunflower leaves, 257
Crops, hunger signs in, monograph, 658
Cucurbita pepo, phloem exudate, significance in translocation, 61
Culture equipment, for plants, 385
CURRENCE, T. M., Refractive index as an estimate of quality between and within muskmelon fruits, 611
CURTIS, O. F., Automatic conductivity measurements of CO_2, 643

D

Dates, pH determination, 407
Death, influence on water absorption at contiguous regions of roots, 33
Dedication, note on, 841
Deficiencies, mineral, If they could speak, 433
Deficiency symptoms, calcium, in bean plant, effect of form of available nitrogen on, 145
Deficiency, manganese, effect on histology of the tomato, 189
nitrogen, and inhibition of increase and activity of tobacco-mosaic virus, 227
Dehydration injury, 171
Determination, of chemical characteristics of soils, 39
of pH, in plant tissue, 405
potassium, by cobaltinitrite method, effects of temperature and pH, 411
DEXTER, S. T., Effects of periods of warm weather upon the winter condition of a plant, 181
Diagnosis, foliar, study of climatic influences on nutrition of greenhouse tomatoes, 117
Discs, potato, effects of pH and components of bicarbonate and phosphate buffered solutions on metabolism of, 481
effects of salt concentration on metabolism of, 85
Distilled water, effect on root development, corn, tomato, 555
Distribution, of intermediate products of photosynthesis in plant cell, radioactive carbon, 654
of moisture, in soil containers, 821
unequal, of soluble solids, in pulp of citrus fruits, 293
Dormant period, yellow poplar, changes in composition of twigs and buds during, 415
DURELL, WILLIAM DONALD, The effect of aeration on growth of the tomato, in nutrient solution, 327

E

EATON, FRANK M., Plant culture equipment, 385
Water uptake and root growth as influenced by inequalities in the concentration of the substrate, 545
Use of nitric acid in control of pH and nitrate levels in nutrient solution, 834
Eighteenth annual meeting, A.S.P.P., 837
Election, annual, 657
Elements, minor, second annual supplement to bibliography of, 658
trace, significant rôles in plant nutrition, 435
ELTINGE, ETHEL TABER, Effect of manganese deficiency upon the histology of *Lycopersicum esculentum*, 189

Enzyme research, methods of, E. BAMANN and K. MYRBÄCK, 220, 432, 659
Epidermal cells, production of solutes in, 637
Equipment, plant culture, 385
Errata, 430, 842
Estimate of quality, muskmelons, use of refractive index for, 611
Exchange, base, total capacity of soil, determination of, 43
Exchange capacity, organic colloid, determination in soils, 45
Excised barley shoots, transformation of sugars in, 599
onion roots, water balance in, 447
Experimental plots, automatic watering of, 207
Extract, irradiated leaf, transmission spectrograms, 210
leaf, transmission spectrograms, 425
Extracts, of soils, in determination of chemical properties of soils, 48
plant, spectroscopic analysis of, for chlorophylls *a* and *b*, 651
Exudate, phloem, of *Cucurbita pepo*, significance in translocation, 61
volume of, relation to volume intake of water, in onion roots, 447

F

Fall grown tomatoes, greenhouse, foliar diagnosis study of climatic influences on nutrition of, 117
Fellowship, for women, 431
FERGUSON, FREDERICK F., Comparative transmission spectrograms of an irradiated leaf extract, 210
Comparative spectrograms of different concentrations of leaf extract, 425
FERGUSON, W. C., The effect of high concentrations of carbon dioxide on the glutamine and asparagine metabolism of the sugar beet, 677
Fermentation, alcoholic, formation of formic acid in, 755
formation of lactic acid by yeast in, 343
Field samples, of soils, collections and preparation of samples for analysis, 40
FIFE, J. M., The effect of high concentrations of carbon dioxide on the glutamine and asparagine metabolism of the sugar beet, 677
Films, plastic, seed impressions on, 422
Fixation, symbiotic nitrogen, PERRY W. WILSON, 219
Flowering, of wheat, effects of x-rays on, 378
Fluids, from plant tissues, a press for recovery, 419
Foliar diagnosis, study of climatic influences on the nutrition of greenhouse tomatoes, 117
Formation, root, of *Phaseolus vulgaris*, factors affecting, 585
of formic acid, in alcoholic fermentation, 755
of lactic acid by yeast in alcoholic fermentation, 343
Formic acid, formation in alcoholic fermentation, 755
Freezing point, of citrus juice, 304
FRENKEL, ALBERT W., Photosynthesis with radioactive carbon, and the distribution of the intermediate products in the plant cell, 654
Fruit production, modern, J. H. GOURLEY and FREEMAN S. HOWLETT, 660
Fruits, citrus, unequal distribution of soluble solids in the pulp of, 293
muskmelon, refractive index as an estimate of quality, 611
FULLER, HARRY J., General botany outline, 433
FURNSTAL, A. H., A press for recovery of fluids from plant tissues, 419

G

Galleys, 217
GANONG, WILLIAM FRANCIS, life membership award to, 215
obit., 842
Gas, in brown alga, *Nereocystis luetkeana*, pressure - composition relationships, 361
GEHENIO, P. M., Life and death at low temperatures, 221
General botany, outline, HARRY J. FULLER, 433

GIRTON, RAYMOND E., A sieve tube translocation model, 831
Glutamine metabolism, effect of high concentrations of CO_2, sugar beet, 677
GOURLEY, J. H., Modern fruit production, 660
Grass, Sudan, accumulation of arsenic in shoots of, 521
Gravity, relation to absorption of water by roots, 32
Greenhouse tomatoes, foliar diagnosis study of climatic influences on nutrition of, 117
Growth, of plants, determination of chemical characteristics of soil affecting, 39
of tomato, in nutrient solution, effect of aeration on, 327
of trees, effect of cicada injuries on subsequent, 827
of wheat, effects of x-rays, 373
root, influenced by inequalities in concentration of substrate, 545
Growth-promoting substance, phenylacetic acid, lack of inhibition of lateral buds by, 203
GUSTAFSON, FELIX G., Lack of inhibition of lateral buds by the growth-promoting substance phenylacetic acid, 203

H

HAAS, A. R. C., pH determination in plant tissue, 405
HALES, STEPHEN, award to PHILIP RODNEY WHITE, 216
Hardened condition, winter, effect of warm weather, 181
HASSID, W. Z., Transformation of sugars in excised barley shoots, 599
Hay, alfalfa, hexose-phosphate in, 212
Heading, of wheat, effects of x-rays on, 378
Heart of France, aster, effects of supplementary illumination on metabolism of, 621
HENDRICKSON, A. H., Moisture distribution in soil in containers, 821
Hexose-phosphate, in alfalfa hay, 212
HIMMEL, WALTER JOSEPH, obit., 842
Histology, of tomato, effect of manganese deficiency on, 189
HOHL, LEONORA A., Lactic acid formation in alcoholic fermentation by yeast, 343
Formic acid formation in alcoholic fermentation, 755
HOWLETT, FREEMAN S., Modern fruit production, 660
Hunger signs, in crops, monograph, 659
Hydrogen, exchangeable, of soil, determination of, 45
Hydrogen-ion concentration, tolerance of shortleaf pine seedlings to variations in, 313

I

Illumination, supplementary, effects on carbohydrate and nitrogen metabolism of the aster, Heart of France, 621
Impressions, seed, on plastic films, 422
Index, general, vol. 16, PLANT PHYSIOLOGY, 845
refractive, as an estimate of quality, muskmelon fruits, 611
Indicators, preparation for volumetric analysis, 59
Induced root modifications, *Vicia faba*, with soft x-rays, 159
Inequalities, in concentration of substrate, and water uptake and root growth, 545
Inhibition, lack of effect on lateral buds, by phenylacetic acid, 203
of increase and activity of tobacco-mosaic virus, with nitrogen deficiency, 227
Injury, caused by cicada, effect on later tree growth, 827
dehydration, and resistance, 171
Intact roots, comparison of rates of water intake in contiguous regions, 19
Intake, volume of, relation to volume exudate of water in onion roots, 447
Integrating light recorder, inexpensive, 629
Intensity, low light, response of seedlings to various wavebands, 241
of nutrition, tomatoes, basis of NPK units, 128

Intermediate products, distribution in plant cell, photosynthesis with radioactive carbon, 654
Interrelations, of cations and anions, in a three-salt nutrient, effect on barley seedlings, 813
Iodides, toxicity of, antagonism of chlorides to, 393
Ion, common, to calcium and potassium salts, effect on metabolism of potato discs, 85
Ions, absorption by potato discs, effects of pH and components of buffered solutions on, 481
Iron, relationship to manganese in nutrition, 442
Iron group, soil analysis, 52
Irradiated leaf extracts, transmission spectrograms, 210
Irradiation, low light intensity, response of seedlings to various wavebands, 241
with soft x-rays, root modifications in *Vicia faba*, 159
Isolated roots, comparison of rates of water intake in continguous regions, 19
root segments, onion, water balance in, 447
